DETAILED ACTION

Applicant's election with traverse dated February 21, 2007 in response to the restriction requirement mailed on December 15, 2006 is acknowledged. Applicants have elected Group XIV (claims 52-59) with further election of the species: "a derivative of polyethylene glycol". Claims 1-51, 60-61 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to non-elected groups, there being no allowable or linking claims. Applicant's argument regarding non-elected invention of Group II and III will be considered for rejoinder in future applications.

Upon further consideration, the Examiner finds that the elected group XIV (claims 52-59) comprises patentably distinguishable species of tRNA synthetase sequences (SEQ ID NO: 48-53) used to aminoacylate a corresponding tRNA with a specific p-azidoPhe unnatural amino acid to be used in conjunction with the PEG.

Claim 52 is generic to the following disclosed patentably distinct species: SEQ ID NO: 48-53. Thus applicants must elect a single species of ORS from the group selected from SEQ ID NO: 48-53.

The species are independent or distinct because each sequence is structurally distinct thus the sequences have a materially different design and are not obvious variants of each other. Therefore, where structural identity is required, the different sequences have different effects. Each of the ORS can accommodate a distinct species of a p-azido-Phe onto a tRNA i.e. both the azido group and/or the PEG group attached

to said azido group can be distinct from each other thus the ORS that aminoacylates a tRNA can also be structurally distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
